

Project Data

Project :	Huntsman
Location (City, Country) :	Everberg, Belgium
Construction year :	September 2010
Roof size :	600 sqm
Building type :	Privat property
Vegetation :	Grasses, Sedum
Green roof installer :	IBIC, Belgium

Huntsman

Huntsman's first green, plant-covered roof was created in September 2010 at the Everberg site, Belgium.

The VYDRO® substrate is employed creating a 600 square meter green roof.

The area has subsequently been planted with sedum – a ground spreading plant and low maintenance alternative to grass.

The result is a roof that improves the overall energy efficiency of the building and create a safe refuge for local birds and insects.
